

# SNSQS-LW Socket Head Cap Screws with Captive Large Flat Washer for Slotted Holes

Vibration resistant treatment Easy operation SUS Stainless steel

## Material/Finish

	<b>SNSQS-LW</b>
Screw Body	SUSXM7 (Equivalent to SUS304)
Screw Body Strength Class	Equivalent to A2-70
Plain Washer	SUS304
Spring Washer	SUS304

- Stainless steel hex socket head cap screws with captive washers for long holes.
- Large-diameter plain washers and spring washers are integrated into the screws, preventing concerns about washer fallout or loss.
- For screws with captive washers, see “What are screws with captive washers (SEMS screws)?” .
- Because large-diameter plain washers increase the bearing surface, the pressure on the fastened material is dispersed, suppressing bearing surface sinkage and loosening.
- Suitable for long holes with small contact surfaces, as well as soft fastened materials such as aluminum or resin.
- Application

Semiconductor manufacturing equipment / Equipment and device structures / General industrial machines

Unit : mm
